## Combat Hair Loss and Re-grow Your Hair With Crescina HFSC 100% treatment Vials

Hair loss is a serious matter as it can negatively affect our self-esteem and whether it's happening to men or women, it's a problem that needs to be addressed and treated to avoid further loss. For many years, the cure for hair loss and balding patterns seemed unlikely to recede and the only way to cure it was by resorting to hair transplant, which is not a convenient or affordable method for many. **Crescina's HFSC 100% Treatment Vials** are here to fight against hair loss and make regaining new hair possible – in the most natural way.

The treatment contains a specific formulation suitable for both men and women, with potent active ingredients, like Cysteine, Lysine and Glycoprotein that aid in producing new follicles and promote healthy hair growth.

Testing was performed using **Crescina's Re-Growth HFSC 100% vials** on males and females with different grades of hair thinning ranging from light to severe cases and subjects reported significant results in hair re-growth after using the product for 4 months.

# CRESCINA®

The product is for topical use and comes in various dosages depending on the degree of hair thinning, starting at AED 790:

- Dosage 200: For light grades or initial thinning.
- Dosage 500: For medium grades, incipient balding and advanced incipient balding.
- Dosage 1300: For high grades, advanced frontal baldness and severe baldness.

**Crescina's** unique properties prevent the ageing of hair follicles, stimulate cell activity and the physiological growth of hair. The Swiss patented formula is FDA approved and sold only through leading pharmacies in the UAE including Bin Sina.
